Chad Koslovsky

Build with AI. Own what it does.

Milliken, Colorado · chad@koslovsky.xyz

Senior Software Engineer (Full-Stack, AI-Native) | Marvin

View my interactive resume and work: https://marvin.koslovsky.xyz

01 PROFILE

I combine full-stack implementation with hands-on operations and AI tooling. My focus is the useful system around the model: clear interfaces, explicit state, connected context and a way to investigate what went wrong.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client products from requirements through React/TypeScript interfaces, APIs, data and ongoing operation.

Build MCP connectors, authenticated integrations and tenant-aware services that keep AI tools connected to real application context.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated marketplace-data workflows, repricing rules, accounts, subscriptions and billing.

Owned application support and technical operations across a sustained full-stack client engagement.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Set up hosted web services, developed in PHP and JavaScript, and handled billing-system development and replacement.

Combined that software work with NOC leadership, engineering escalations, Docker and production recovery.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected CRM, provisioning, onboarding and service operations through centralized applications.

Worked with the CEO and CIO to turn cross-location business handoffs into shared workflows.

03 SELECTED WORK

Technomancy platform | Connected context and AI workflows · Own practice and client-operations product

Connected customer, support and billing records through tenant-aware TypeScript/PostgreSQL services.

Use graph modeling, indexed retrieval and batch evaluation alongside tool integrations and structured workflows.

ProofMark | Explicit document and identity state · Completed client engineering contribution

Connected signing, identity, document fields, routing and audit history in a completed client contribution.

Built React/Next.js, API and PostgreSQL workflows with explicit security-sensitive state and fallback paths.

Kerf | Tools for people and coding agents · Own framework, early development

Built an early TypeScript/TSX framework with its own compiler, UI tools, routing and data layer.

Develop reusable contracts and actionable compiler diagnostics for people and coding agents.

04 CAPABILITIES

TypeScript / React / Next.js / Node.js / PostgreSQL · MCP connectors / structured AI outputs / retrieval and review gates · Identity / typed APIs / document workflows / reusable UI contracts · AWS / Docker / delivery checks / production troubleshooting
